

About

I am Razvan Web Designer with 2 + year experience. I am a highly motivated, focused, and consistency-oriented Web Designer. I value knowledge and efficiency.

Coming from a creative background, I decided to pursue a career in UI Development | Web Design as I believe it better suits me. I am a rational person, a born problem-solver with a great degree of patience and neatness when doing my job. Mostly self-taught I can say I have a working knowledge of web applications, programming languages, and web services, such as :

HTML, CSS, Bootstrap, WordPress, Adobe Illustrator, Adobe Photoshop, etc.

WORK EXPERIENCE

— 2021 - 2022

ClearSkyNetwork + Porat Group

deep understanding of the B2B frameworks within the Forex/ Law/ Blockchain verticals. Throughout my time at Clearsky Network, I have been accustomed with the multiple facets of both web design and graphic design. From one side, I got the privilege to work with both tech companies, creating personalized websites depending on the clients' business goals and requirements. However, from the other side, I refined and further expanded by UX/ UI skillset together with Merx Media and McTraffic to create customer friendly (B2C) conversion funnels as part of our lead generation/ affiliate marketing services. From UX research and mockups to web development and optimization, I strengthened not only my compassion but also my comprehension of the full business development process & how the digital business presence's pieces of the puzzle can and should blend in to ensure a positive ROI.

— 2019 - 2021

Freelance Fiverr

I was creating responsive web design services for projects in WordPress (elementor), Figma and adobe xd.

In general, the projects were e-commerce, landing pages, portfolio websites, business websites, marketing websites, etc.
